

repAtr skin

Presented by Anusha, Elise, Elin, Isobel, & Nadia

Hello!

Elise Green

Graduated this summer from math at UBC

- Currently working for Fisheries and Oceans Canada on web-apps and data solutions

Nadia Rashid

3rd Year Computer Science student at Monash University

- Recently completed an exchange semester at UBC

Elin Lee

3rd Year Biomedical Engineering student at UBC

- Currently taking a co-op at a Robotics Lab
- Interested in machine learning and AI

Isobel Adams

4th Year Statistics student at UBC

- Interested in machine learning and software development

Anusha Thukral

4th Year Cognitive Systems student at UBC

- Just finished an exchange semester in Spain

Introduction - Elise

Introduction - Nadia

Project Ideas

Tech Skills

- computer vision
- machine learning

Medtech Field

- well-being
- health

Positive Impact

- boost a person's confidence & self-image

Demo Time!

Our Contributions

Elise

Trained the machine learning model and integrated it into the app

Elin

UI/UX designs (app icon and launch screen)
Collected products data for our database

Isobel

Implemented chatbot and camera view
Communicated with OpenAI's API

Nadia

Developed data models for storing user and product information in the app's database using SwiftData

Anusha

Implemented a survey page on the home view
Researched proper questions to ask to recommend the tailored products

Tools & Softwares

Elise

- Kaggle
- Python
- Ultralytics
- YOLOV8 model
- CoreML format
- Swfit integration

Elin

- Swift
- Xcode
- Canva (UI/UX design)

Isobel

- Swift UI
- OpenAi's API
- Swift AVFoundation package

Nadia

- Python
- SwiftData

Anusha

- Swift

Computer Vision Quick Description - Elise

Computer Vision Techstack - Elise

SwiftData - Nadia

Project Challenges & Our Learnings

Elin

- first time using Mac and iOS operating systems + Xcode + Xcode + UI/UX designs
- joined the team late
- first time using Swift

Isobel

- hard to collaborate with the team due to hectic schedules and different time zones
- managing git/github
- working with API
- first time using Swift

Anusha

- issues with pushing code using git
- different time zone from Spain

Learnings - Elise

Learnings - Nadia

Conclusion

Future Trial Ideas

- Log in profiles with saving user information
- Scan entire face, with variety of angles
- Discover more products
- Gain professional help from healthcare professionals

Personal (Elin & Nadia)

- Go deeper with Xcode
- Familiarize with the Mac and iOS operating systems
- Try working on database and different parts such as machine learning

Thank you
